COMMUNITY TRANSFORMATION PROJECTS

- *Omega Generation Youth Mentorship Program* (co-founder)
This is a one-year mentorship program targeting Latino/a young adults labeled as generation Ñ, which is an alternative description to Millennials in the Anglo-American context. This program has a fourfold objective: (1) awareness of the complexities surrounding the sense of cultural identity in a global context such as Los Angeles, in a postmodern and post-Christendom epoch; (2) competency to develop a relevant spirituality from a generational perspective; (3) the experience of coaching in the interest of achieving professional excellence in correspondence with kingdom ethics, while participating in the economic and political life of global America; (4) the casting of a civic vision that places the emphasis on the proper use of power, wealth, and faith—to give back to the weak and poor in the world, Christian solidarity, opportunities for social change, material resources, political advocacy, etc.
- *Transnational Mission Routing* (facilitator)
This project involves the task of establishing, nurturing, and expanding transnational mission connections between two or more churches of different geographical and contextual locations by which both churches (or groups of churches) are enriched and

transformed in the act of exchanging visions, stories, and ministry resources. The outcome is the establishment of a transnational mission route sustained by a transnational missiology and praxis. I have so far established the following transnational mission routes between Los Angeles and Chiapas/Oaxaca, Mexico; La Habana, Cuba; Suzuka, Japan.
