

VA Transfer Credit Policy

As required by **38 CFR § 21.4253(d)(3)**, Fuller Theological Seminary will systematically assess the educational and training background of every veteran by soliciting information and transcripts from all relevant sources, encompassing previous military training, conventional college coursework, and vocational training. Thorough evaluation of these transcripts will be conducted, and credit will be granted where deemed appropriate. Academic credit for prior coursework will only be given if it is relevant to students' degree requirements.

Requests for transfer of credit for approved graduate studies done at an institution accredited by The Association of Theological Schools or a recognized regional or international accrediting agency will be evaluated on an individual basis by the Academic Advising Office.

Please note:

- Per the Veterans Administration, all veteran student transfer credit must be evaluated. If the student does not submit all transcripts, he/she will not be certified for the use of VA education benefits until transcripts are submitted and reviewed.
- Veteran students using education benefits are not permitted to opt out of prior credit evaluation.
